

# Technology Find Facts Fast Research Service

**Quickly Uncover Key Documents at Any Point in Any Matter: What if you could understand the key facts of your matter at the beginning of the project and use that knowledge to drive your strategy?**

Legal teams regularly rely on production review to identify key documents, and are delayed in understanding the substance of the matter and developing case strategy until this process is over. The Find Facts Fast Research Service from FTI Technology presents a paradigm shift away from relying on document-intensive, serial reviews to develop case themes. As the traditional e-discovery process is underway, the Find Facts Fast Research Service works in parallel to analyze and evaluate a large data set and quickly identify important documents and themes within those documents. This enables clients to develop case strategy faster and be better prepared for settlement negotiations, presentations to the government or regulators, depositions, motions and trial.

## **WITH FIND FACTS FAST RESEARCH SERVICE, CLIENTS CAN QUICKLY:**

- Assess the merits of a legal or investigative matter and decide course of action.
- Understand the story the documents tell, in advance of anticipated government action.
- Develop the case narrative.
- Find evidentiary support for motions.
- Uncover surprise documents or themes.
- Gain insight into the roles and relationships of custodians in advance of interviews.
- Prepare for depositions or trial.
- Analyze the content of inbound productions.
- Assess data populations not considered for review to ensure key material is not left on the table.

## **THE FIND FACTS RESEARCH SERVICE IS A COMPLETE OFFERING THAT INCLUDES:**

### **Expert researchers:**

From lawyers to investigators with deep vertical industry expertise, our experienced team applies tenacious research and problem-solving skills with an aptitude for thinking outside of the box.

### **Advanced analytics:**

More than smart searching, our analytics software summarizes large sets of documents at a high level then lets researchers zoom in and understand individual documents in context. This grouping allows the research team to focus on a set of similar files and efficiently evaluate their contents and importance.

### **Proven workflow:**

We collaborate with counsel to understand the matter, surface and escalate the relevant materials quickly, and iterate on this process to ensure an effective and transparent process. The Find Facts Fast team closely collaborates with the case team to quickly surface important findings and nimbly adapt the research direction.

FTI Technology's Find Facts Fast Research Service is tailored to meet specific client needs. Whether you need a short research project to assist at a specific point, or supporting research throughout the entire matter – in anticipation of action through to trial prep – FTI Technology can right size the approach for you.

## EXAMPLE MATTERS

**Regulatory investigation:** Concurrent with production review, the Find Facts Fast Research team began its investigative process on a fast-moving regulatory investigation. Within a matter of days, the research team surfaced all of the vital issues and key documents. These findings enabled the client to understand the case issues and have informed discussions with the regulator. In addition, the client was able to conduct knowledgeable and focused interviews with the relevant employees, rather than broad interviews to conduct early fact-finding.

**Litigation deposition preparation:** Client engaged FTI's Find Facts Fast Research team to assist in developing the themes and finding the documents that would be used with each witness during deposition preparation. The starting document population was larger than 500,000 documents. Using analytics, the researchers identified each document that ultimately was shown to the witnesses by the other side during depositions.

**Case theme development:** Early in the litigation, FTI's Find Facts Fast Researchers analyzed more than 5 million documents to find documents supporting the client's defensive themes. Within the first week of research, the team identified several dozen documents that supported the themes, including many hot documents.

## TRUSTED GLOBAL LEADERS IN INFORMATION GOVERNANCE, E-DISCOVERY, AND INVESTIGATIONS

As part of FTI Consulting, FTI Technology offers deep experience in delivering tangible results in the context of investigations, litigation, mergers and acquisitions, regulatory issues, reputation management and restructuring. Our professionals, including forensic experts, corporate investigation specialists and technology and e-discovery professionals, are industry leaders experienced in many of the largest e-discovery matters of the past decade.

## ABOUT FTI TECHNOLOGY

FTI Technology solves data-related business challenges, with expertise in legal and regulatory matters. As data grows in size and complexity, we help organizations better govern, secure, find, analyze and rapidly make sense of information. Innovative technology, expert services and tenacious problem-solving provide our global clients with defensible and repeatable solutions. Organizations rely on us to root out fraud, maintain regulatory compliance, reduce legal and IT costs, protect sensitive materials, quickly find facts and harness organizational data to create business value.
