

Information Governance, Privacy & Security Services for Healthcare Organizations

Securing sensitive data and ensuring regulatory compliance

Healthcare organizations face a number of challenges in establishing the appropriate administrative, physical and technical safeguards to ensure it creates, maintains, transmits, and receives information containing Protected Health Information (PHI) compliant with applicable regulations. Compliance challenges not only include satisfying regulations such as the Health Insurance Portability and Accountability Act (HIPAA) and Title 21 CFR Part 11 or the Affordable Care Act, but also how to reduce cost, create efficiency, and leverage existing resources.

DEEP DOMAIN EXPERTISE IN:

Data Privacy and Security Engagements

Auditing the Handling of Sensitive Personal Data and PHI

HIPAA Security and Privacy Risk Assessments

Previous clients include:

- Medical Technology Companies
- Large Healthcare Organizations
- Medical Device Manufacturers
- Pharmacies
- Pharmaceutical Companies

FTI Technology's Information Governance, Privacy & Security services can help healthcare organizations cost-effectively comply with existing regulations through a customized program of services, including:

- Evaluating adherence to the HIPAA Privacy Rule (*located at 45 CFR Part 160 and Subparts A and E of Part 164*) and HIPAA Security Rule (*located at 45 CFR Part 160 and Subparts A and C of Part 164*) and issuing summary reports.
- Conducting a compliance gap analysis to measure existing policies and procedures against HIPAA requirements
- Auditing existing IT systems and processes to assess risk. This can include an end-to-end systems inspection, employee interviews and evaluating policy documentation.
- Finding critical data across various platforms and safely remediating sensitive patient or employee data, including health records and payment information.

Trusted Global Leaders in Healthcare

FTI provides a cross-functional, multi-disciplined team of experienced compliance, IT, operations, audit, data analytics and performance improvement professionals that specialize in assisting healthcare organizations maintain compliance with privacy and security requirements. Our team includes professionals with expertise in Medicare compliance, corporate communications, healthcare audits, cybersecurity, data analytics and healthcare and compliance IT systems.

The FTI Information Governance, Privacy & Security team has extensive experience evaluating administrative, technical and physical safeguards around protected health information, has identified vulnerabilities and weaknesses in existing safeguards, and recommended steps to mitigate risk. These assessments focus on internal and external policies, procedures, and products to provide a fulsome view of HIPAA risk exposure. The team has expertise in conducting HIPAA Security Rule and Privacy Rule Assessments in an efficient and targeted manner, scoping findings to consider, not only security and privacy risks but also feasibility of implementation and potential impact on business.

We use our expertise and vast experience in legal, business and technical matters to work with clients to implement recommended remediation measures in a defensible and financially sound way.

Technical, Legal and Regulatory Expertise

The FTI team offers deep experience in delivering tangible results in the context of investigations, litigation, mergers and acquisitions, regulatory issues, reputation management and restructuring. Our professionals, including forensic experts, corporate investigation specialists and technology and e-discovery professionals, are industry leaders experienced in many of the largest e-discovery matters of the past decade.
