

E-discovery, In Your Language

Businesses are no longer limited by borders or time zones. Advancements in technology and connected devices allow for business to be conducted from anywhere at any time. As a result, dealing with compliance, regulatory, or legal matters has become increasingly complex.

Ringtail gives you the e-discovery technology you need to execute on global legal matters. Allowing you to review, redact, code and search documents in over 20 languages, including:

European and Middle Eastern:

- Italian
- Norwegian (Bokmål and Nynorsk)
- Persian
- Portuguese
- Russian
- Slovak
- Slovenian
- Spanish
- Swedish
- Arabic
- Catalan
- Croatian
- Danish
- Dutch
- English
- Finnish
- French
- German

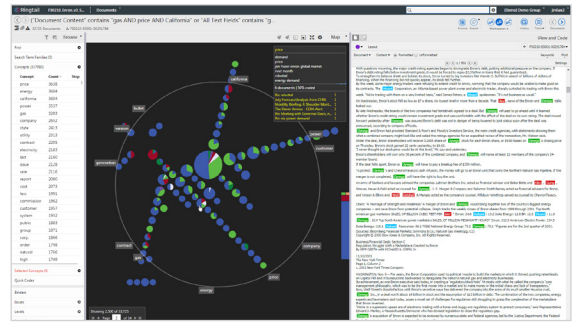

Asian:

- Chinese (*simplified and traditional*)
- Japanese
- Korean

Process, Search, Review and Produce

Ringtail's Unicode processing engine allows documents to be processed, indexed, searched, reviewed and produced in their native language from across the globe with all the efficiency you have come to expect from Ringtail.

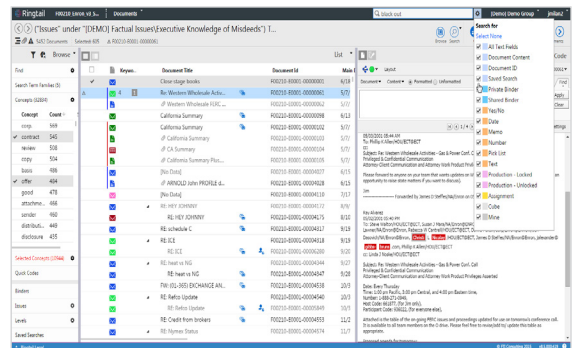

Smart Language Routing

For On Demand users, Ringtail's advanced language detection can route documents to the reviewer best equipped to handle a particular language.

Translation

Machine language translation enables the real time conversion of documents into the language specified for your review. Ringtail's intuitive interface allows you to view the translated documents alongside native files for easy side-by-side language comparison.

User Interface

Ringtail's user interface is available in both English and French for enhanced international usability.
