

Data Protection Officer (DPO) as a Service (France)

Efficient, Cost-Effective Support of GDPR Data Protection Officer Requirements

The General Data Protection Regulation (GDPR) requires many organisations to appoint a Data Protection Officer (DPO) to oversee data privacy risk and compliance. While the requirement is relatively straightforward, its elements can make the DPO role difficult for companies to fill. The DPO must have expert knowledge of data protection law and practices, possess the skill to properly monitor the company's GDPR compliance and data privacy risk, train staff, conduct assessments, maintain processing records, conduct audits and liaise with supervisory authorities.

Services Offered

The FTI team offers expertise in executing the following DPO responsibilities in a primary or supporting role:

- Data subject requests response and tracking;
- Data protection impact assessment reviews and escalation;
- Metrics compilation and reporting;
- Breach logging, investigation, and notification support;
- Records inventorying;
- Training and internal communications development;
- Requirements tracking and documentation support.

For many organisations, optimising the DPO role can be a challenge because too much day-to-day reactive work falls on what should be a strategic position. To address this, FTI Technology has developed an 'Office of the DPO' support offering, to deliver right-sized and expert services that help corporations meet this crucial requirement of the GDPR.

Office of the DPO: How it Works

With FTI's Office of the DPO offering, the FTI team effectively acts as your organisation's back office privacy program. The team provides day-to-day operational and subject matter support for organisations that have an internal DPO but need additional cover for certain tasks or at specific times. At the direction of the internal DPO, the FTI Office of the DPO support team executes risk management coordination and oversight activities. FTI also works collectively with the client to determine when and if the DPO Support Team engagement is required and can increase or decrease staff depending on client need and risk exposure. In this way, the FTI team provides crucial DPO support while adding an overlay of in-depth risk and compliance oversight to the organisation as a whole.

Why FTI for Office of the DPO

Prioritisation of Data Value

We work to understand client products and services and develop a DPO strategy that reduces risk around personal data and improves that data's value by making it more transparent, which enables clients to make more effective business decisions.

Extensive Privacy Regulatory Experience

Our global team has experience designing and building DPO solutions that meet regulatory requirements across markets (North America, EMEA, APAC).

Strong Technical Expertise

We have wide-ranging experience with diverse data environments, including off-the-shelf and in-house enterprise platforms and applications.

Effective Program Execution

Our team translates high-level requirements into executable project plans and uses an array of workflows to fit the specific parameters of the project - from proven, out-of-the box methods to custom processes designed specifically for the Corporation's business model.

Truly Cross Functional Service

We leverage a wide range of global subject matter expertise across FTI Consulting to enhance our DPO services for several specific verticals (technology, financial services, life science, healthcare and others), regions and use cases.

Trusted Global Leaders in Information Governance, E-discovery and Investigations

FTI Technology's Information Governance, Privacy & Security Services are tailored to the specific needs of each client and the FTI team offers deep experience in delivering tangible results in the context of investigations, litigation, mergers and acquisitions, regulatory issues, reputation management and restructuring. Our professionals, including forensic experts, corporate investigation specialists and technology and e-discovery professionals are industry leaders experienced in many of the largest regulatory and data privacy matters of the past decade.

About FTI Technology

FTI Technology solves data-related business challenges, with expertise in legal and regulatory matters. As data grows in size and complexity, we help organisations better govern, secure, find, analyse and rapidly make sense of information. Innovative technology, expert services and tenacious problem-solving provide our global clients with defensible and repeatable solutions. Organisations rely on us to root out fraud, maintain regulatory compliance, reduce legal and IT costs, protect sensitive materials, quickly find facts and harness organisational data to create business value.
