

IQ.AI by FTI Technology

EXPERTS WITH IMPACT™

Synchronising Strategy, Technology and Risk along the AI Journey

The growing demand for AI solutions is increasing pressure on legal, compliance, and corporate business functions to find practical, cost-effective use cases that do not increase risk. While AI, particularly generative AI, has potential to transform the legal landscape, it's essential that legal and compliance teams trust the technology's results. Because of these factors, many organizations are struggling to define effective AI strategies and demonstrate the tangible value of their AI initiatives.

IQ.AI by FTI Technology is an advanced suite of AI-driven solutions designed to address data-intensive challenges in legal and compliance matters. Developed by a team of digital insights experts, lawyers, data scientists, and consultants from across FTI's global practice, IQ.AI empowers law firms and corporate legal teams to automate complex tasks, enhance decision-making, and defensibly manage data.

Consultative, Validated Approach

"We have made significant investments in AI research and development, including expanding our software engineering capabilities and hiring data scientists with e-discovery expertise, who underpin our IQ.AI solutions. We will continue to enhance and build upon these offerings as AI technology and regulations evolve, serving as a trusted advisor every step along each client's AI journey."

Sophie Ross
FTI Technology CEO

Trusted Results

"As clients work to understand how to benefit from AI, uncertainties remain regarding the impact, cost, scale and reliability of large language models currently available.

Additionally, the regulatory landscape is changing rapidly around AI, making it difficult for organizations to determine whether their projects may introduce compliance concerns. These factors highlight the critical need many organizations have for expertise, training and alignment to guide their AI strategies. IQ.AI supports these demands via extensive testing and customization to achieve defensible, fit-for-purpose workflows."

Jon Chan
Senior Managing Director

Our Experience

Comprising a team of data scientists, software engineers and consultants who work daily on global legal and regulatory matters, FTI's IQ.AI solutions focus on ensuring that the AI-based technology and workflows deliver measurable value, scalability, speed, accuracy, risk management, automation and verifiability.

As advisors with more than 20 years of experience in Artificial Intelligence and Machine Learning, our experts have helped a wide range of business roles to improve their data and analytics-based work.

Our Approach to Generative AI

FTI Technology follows a set of guiding principles for our approach to Generative AI:

- Ensure that Generative AI is a complement to human judgment, never a substitute;
- Remain cautious, with a focus on accuracy;
- Be thoughtful and model-agnostic as Generative AI technology rapidly evolves;
- Remain practical and experimental to remain at the forefront of AI use;
- Offer clients flexibility and the opportunity to refine.

IQ.AI, powered by FTI Technology, is an advanced suite of AI-driven solutions designed to address data-intensive challenges in legal and compliance matters. Developed by a team of digital insights experts, lawyers, data scientists, and consultants from across FTI's global practice, IQ.AI empowers law firms and corporate legal teams to automate complex tasks, enhance decision-making, and defensibly manage data.

IQ.AI Comprises:

- **Expertise:** Decades of experience applying industry-leading advanced data analytics and Artificial Intelligence in legal and compliance use cases
- **Workflows:** Proprietary and proven workflows that reduce the cost and risk while maximizing value, scalability, accuracy, automation and verifiability
- **Technology:** Best-of-breed approach leveraging LLMs and advanced analytics and AI functionality in Relativity aiR, Reveal and other industry-leading platforms

Solutions for your AI Journey

By leveraging proprietary tools and industry-leading platforms, IQ.AI provides tailored advisory and technical solutions, helping organizations harness the full potential of AI while maintaining trust, defensibility, and compliance across diverse use cases. Whether solving for large-scale investigations, improving document review processes, or navigating regulatory hurdles, FTI's expertise ensures that AI delivers practical, reliable, and cost-effective results. IQ.AI by FTI Technology delivers FTI-developed AI-based products and services, alongside best-of-breed third-party products, to tackle complex data challenges encountered in investigations.

IQ.AI solutions include:

IQ.AI for Review

IQ.AI for Review addresses the growing complexity of data involved in litigation and investigations. FTI Technology leverages best-of-breed technology, workflows, and expertise to overcome challenging data issues upfront, deliver faster first-pass review, optimize quality control and privilege efforts, and streamline the delivery of key findings more efficiently than traditional protocols.

IQ.AI for Contracts

IQ.AI for Contracts delivers methodologies for leveraging AI in contract review and analysis to efficiently query large contract populations, identify business opportunities, reduce costs or identify risks hidden within agreements.

IQ.AI for Investigations

Each investigation presents unique data challenges that are more complex than ever before, from emerging data sources to increasing data volumes. For more than a decade, FTI Technology has been at the forefront of using AI, advanced analytics and sophisticated workflows to bring speed and efficiency to investigations in a trusted and cost-effective manner. IQ.AI for Investigations provides clients with an effective AI-based approach to help clients find what they need faster.

IQ.AI for Antitrust

Driven by high volumes of data, short timeframes and high stakes, clients need seasoned practitioners with extensive experience when handling antitrust issues. For more than a decade, FTI Technology has been the trusted leader in antitrust work to help clients bring speed and efficiency to antitrust investigations in a comprehensive and cost-effective manner. IQ.AI for Antitrust provides clients with a flexible, trusted AI-based approach to help clients deliver results on time.

IQ.AI for Data Breach

Organizations are increasingly required to assess large volumes of data in short timeframes to respond to mandatory data breach notification requirements and protect client's and employee's personal data. FTI's experienced team leverages AI to map, capture and preserve exposed data, locate potentially compromised data such as PII, and quickly review the relevant dataset for efficient breach response. IQ.AI for Data Breach provides clients with a trusted AI-based approach to help clients quickly assess and respond to urgent data breach incidents.

Efficient. Practical. Smart. Collaborative. Global. Problem-Solvers.

These are the terms our clients use to talk about us. We pride ourselves on our long-standing client relationships and deep expertise in digital risk management and intelligence services.

Focused on Results

Our expert team not only develops the strategies and policies but has the legal and technical know-how to execute those plans effectively and defensibly.

Best-In-Class Client Service

Our client services model, from employee training to team structures to workflow and reporting dashboards, is designed to anticipate client needs and exceed expectations.

Global Scale

With teams in 30 countries, we can scale globally without sacrificing quality while helping clients transform their legal operations.

Right-Sized Solutions

Our services are tailored to meet specific client needs, from small advisory engagements to complete transformational projects including expert managed services.

Trusted Leaders in Digital Risk Management and Intelligence

Our experts span a broad range of areas that help organizations tackle every aspect of complex data challenges. This includes technical, legal, regulatory, and investigative expertise, as well as more nuanced skillsets, such as change management.
